Understanding Your Monthly Sewer Charges. Each year during the month of May, your sewer charge is recalculated based on your actual water usage billed during the months of January, February and March. All customers have a water meter to determine water consumption, however, there is no way to measure how many gallons each customer sends into the sewer system. It is estimated that 90% of all water used in a single-family home during the three month winter averaging period goes into the sewer system and the remaining 10% is used for drinking, cooking, landscaping and other outside uses.

It is prudent to carefully watch the amount of water used during January, February and March to ensure that the sewer portion of your bill is calculated on the lowest water use possible. If you find that you may have used extra water at that time due to a leak, filling a pool or just watering winter grass, there is a form that is available to appeal the higher than normal water use. Call 623-930-3190 to request a form or [click here](#) and scroll down to "Sewer Appeal Process" to download a copy. Appeal requests are accepted within 60 days of the May billing and the time to conserve is NOW!
